

THOTSHANG MANGKUNG

Full Stack / Application Developer

+91 9233465938 | thotshangmangkung@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full stack developer with hands-on experience across Flutter, MERN, and Python-based AI applications, spanning fintech, ed-tech, and logistics domains. Skilled at shipping production mobile and web apps end-to-end — from real-time backend systems and API integrations to polished, user-facing interfaces. MCA graduate seeking a full-time full stack or AI application development role.

EXPERIENCE

Python AI Full Stack Developer Intern — Future Transformation

Apr 2026 – Jun 2026

- Build and maintain banking and fintech applications, developing secure, scalable backend services and automating enterprise workflows.
- Integrate third-party and internal APIs to support AI-powered full stack features across enterprise systems.
- Collaborate with cross-functional teams to design and deliver reliable backend architecture for production use.

App Developer (Full-Time) — Iewduh Techz Pvt. Ltd.

Jul 2025 – Dec 2025

- Built and shipped a real-time school bus tracking app using Flutter and Firebase, enabling live GPS tracking and automated attendance logging for students.
- Led end-to-end engineering of Ong Yi App, a multi-service delivery platform, designing real-time order workflows and integrating payment and logistics APIs.
- Owned the app from architecture through deployment, coordinating with design and backend teams to meet release timelines.

App Developer Intern — Iewduh Techz Pvt. Ltd.

Jan 2025 – Jun 2025

- Built a Flutter-based admin application for managing student attendance, fee records, and academic data.
- Improved app UI/UX and implemented real-time data synchronization using Firebase, reducing manual data refresh.

PROJECTS

PrayagEdu Admin (Flutter, Firebase) — Built and deployed a mobile app allowing school principals to manage and switch between multiple schools, monitor staff/student attendance, view results, and handle PTM requests in real time.

AheadStudy (MERN, LLM APIs) — Built an AI-assisted learning platform supporting PDF upload, chatbot-based Q&A, and automatic document summarization.

Employee Management System (MERN) — Developed a full stack app with role-based access (Admin, HR, Employee), secure authentication, attendance tracking, and salary management.

Guitar Chord Generator (MERN, Python (ML)) — Built a system that analyzes uploaded audio and automatically generates the corresponding guitar chords.

Open Layer – Enterprise Workflow Automation Platform (React, Python, FastAPI, MySQL) — Developed an enterprise workflow automation platform for banking and financial processes, enabling automated workflows, API integrations, approvals, retries, monitoring, and transaction tracking across multiple systems.

SKILLS

Frontend: React, Flutter, HTML, CSS, JavaScript (ES6+)

Backend: Node.js, Express.js, Python (FastAPI), Java (Spring Boot), Laravel (PHP)

Databases: PostgreSQL, MongoDB, MySQL

Tools & Platforms: Firebase, Git, GitHub, REST APIs

EDUCATION

MCA, Master of Computer Application — Assam Don Bosco University, Guwahati

2025

BCA, Bachelor of Computer Application — St. Edmund's College, Shillong

2022
